

News on Kansai Airport from SPARC LOC (13 September 2018)

As an alternative to Kansai International Airport, in which flights are currently reduced by about 80%, acceptance of an increase including international flights at Osaka (Itami) Airport (40 flights) and Kobe Airport (30 flights) was decided on 12th. However, to accept international flights, it is necessary to have personnel and facilities for customs, quarantine, and so on. So, it will take more than a week to prepare.
